### ISO9001

GIGAVAC high voltage relays are manufactured to GIGAVAC's exacting standards no matter where they are built. GIGAVAC relays manufactured outside the United States are manufactured in ISO9001 certified facilities and conform to world class manufacturing standards.

GIGAVAC's Far East partner is located in a totally new facility in China built in 2002. They are the largest supplier of high voltage relays in China and many of their key personnel were trained by Jennings, formerly one of the leading suppliers of high voltage relays.

Engineering and production facilities in Europe provide years of experience in the manufacture of high voltage and RF reed relays. Also ISO9001 certified, this part of the GIGAVAC team has the know how to provide high volume, high performance products.

---

Nearly all GIGAVAC relays and contactors are RoHS compliant in accordance with Directive 2002/95/EV (RoHS). RoHS compliant products are as indicated on our web site data sheet with the applicable manufacturing effectively date code.

The part numbers shown as RoHS compliant on our web site have a maximum concentration of 0.1% by weight in homogeneous materials for lead, hex chrome, mercury, PBB, PBDE, and 0.01% for cadmium.

Because we have built up a large inventory to support your delivery needs, it may be possible that some products in stock may not be RoHS compliant. If RoHS compliant products are an absolute requirement, please contact GIGAVAC at [info@gigavac.com](mailto:info@gigavac.com) or phone us at +805-684-8401 before you place your order and we will make sure you receive RoHS compliant products.

---

Many of GIGAVAC's Power Products have undergone testing by outside independent testing laboratories such as Underwriters Laboratories. The status of GIGAVAC's UL Certifications can be found here.

- [Switches, Industrial Control - Component](#)
- [Switches, Industrial Control Certified for Canada - Component](#)

High Voltage Relays - Underwriters Laboratories does not provide general certification for the type of high voltage relays manufactured by GIGAVAC or other manufacturers of this same style of product. Certification in these cases is done at the circuit or system level where the relay is certified for use in the application. [Contact GIGAVAC](#) for further information.
