

OVERVIEW

TODAY'S EXPERT

GIGAVAC® is Today's Expert in High Voltage Relays.

We call ourselves "Today's Expert" because most of us have been involved in engineering, manufacturing and selling high voltage relays for most of our professional careers. We formed GIGAVAC because all the other high voltage relay suppliers were acquired by larger companies who don't seem to understand or care about the needs of high voltage relay customers. At GIGAVAC, we know you need to talk to an expert today so you can have a high voltage switching solution tomorrow, quickly, easily and at a reasonable cost.

WHO ARE WE?

You will find it easy to deal with us at GIGAVAC because we specialize entirely in high voltage relays and know exactly what you need. We have done it for years! Many of our owner experts come from a great little company formerly known as Kilovac*. Included are Doug Campbell, former President & CEO and son of the founder, Mike Molyneux, former head of R&D, Pat McPherson, former VP Sales & Marketing, Jim Lanum, former Product Manager, Rick Danchuk, former Chief Financial Officer, an experienced sales worldwide force who have sold high voltage relays, and a cadre of manufacturing engineers and support personnel who have designed and manufactured Jennings, Kilovac and Hewlett Packard products for years.

WHERE ARE WE?

GIGAVAC's headquarters are in Carpinteria, California, just south of Santa Barbara. This is where our support team with over 60 years of high voltage relay experience is ready to help with your high voltage relay application. At our headquarters, we do the following:

1. Determine which relays are needed today and in the future
2. Make decisions where best to build them so you get the best quality at the lowest price
3. Provide price and delivery information with one phone call so you will not have to make multiple contacts to obtain simple information
4. Ship products from our extensive inventory of stocked relays the same day the order is received

Linden Avenue

We can even give advance replacements if needed for customer returns, so you can still meet your production schedule no matter what the problem may be.

MANUFACTURING

GIGAVAC relays are manufactured to GIGAVAC's exacting standards by the world's experts. GIGAVAC's Far East partner is located in a totally new facility in China built in 2002 and is ISO 9001 certified. They are the largest supplier of high voltage relays in China and many of their key personnel were trained by Jennings, formerly one of the leading suppliers of high voltage relays.

Engineering and production facilities in Europe provide years of experience in the manufacture of high voltage and RF reed relays. Also ISO certified, this part of the GIGAVAC team has the know how to provide high volume, high performance products.

NEW DESIGNS

The GIGAVAC team is truly Today's Expert in High Voltage Relays. By combining the best engineering and manufacturing talent throughout the world, we are able to offer a wide variety of high voltage relays with many more products currently in development. So, if you do not see the product you need, let us know. Chances are it's already in the

“pipeline” and, if not, we have full engineering capabilities and can provide you a prototype faster than anyone.

GIGAVAC MISSION

Our mission is to supply you with what you need when you need it! We have designed our organization to make it easier for you to do business with us. GIGAVAC is a company focused entirely on high voltage relays; not a conglomerate that sells everything from antennas to zoo supplies. Give us a call; a real person will answer the phone.

GIGAVAC OWNERSHIP

GIGAVAC is owned by its employees and its sales force, not a venture capitalist. GIGAVAC's owners are in it for the long term. We depend on satisfying our customers with the best technical support and customer service in the industry; the kind you will not get from a big company. Supplying high voltage switching solutions is not just a job; it's a way of life, where your satisfaction today is our future.

FIELD SALES ENGINEERS

Our independent Sales Representatives are the best in the industry! They have sold high voltage relays for many years and have the experience to understand your application. They will help you select the most economical relay for your needs. Our Sales Reps outside North America will take your order in your own currency, handle the shipping and duties, and have relays on your doorstep in less than a week. All of our Reps also handle complimentary products so you can get total solutions for your high voltage applications. When you deal with GIGAVAC, you get real people that know the products. Should you expect any less from today's expert?

A COMMITMENT TO FIND YOU WHAT YOU NEED

If we do not have a product today that meets your high voltage switching needs, we will refer you to someone who does, even a competitor. We want you to come back to us for your next requirement.
