## Three New High Voltage RF Relays Offered Exclusively to Amateur Radio Operators

Santa Barbara, CA – GIGAVAC®, today's expert in high voltage relays has introduced three new low priced high voltage vacuum relays exclusively for amateur radio operators. For 5kW and below applications, GIGAVAC has created the GH1 Ham which sells for \$69 each. For 18kW applications, they offer the G41C HAM that sells for \$75 each. Their largest new special relay is the 42 kW G2 HAM that sells for \$119 each. All of these relays come with GIGAVAC's 1 year warranty. Delivery is from stock and GIGAVAC accepts most major credit cards.

According to Jim Lanum, VP of Sales for GIGAVAC, "When land and cell phones go down in times of disaster, amateur radio operators are often the only people that can communicate with the outside world to call in emergency assistance. After receiving many requests from amateur radio operators throughout the world we realized they can could typically only afford the prices charged by junk dealers for used or old surplus relays. So we decided to find a way to help these unsung heroes by providing new, low cost high quality relays off-the-shelf when they need them."

Lanum goes on to say "We studied the needs of amateur radio operators and found they did not always need the high ratings our high voltage relays provide. As a result, we developed some new specifications and a classification system so we could provide relays that do not meet the higher specifications of our other relays. We are pleased that we have come up with three new very robust relays that are great for from amateur radio operators. We limit the sale of these relays only to amateur radio operators to assure a ready supply."

The relays and details for purchase can be found on GIGAVAC's web site at [www.gigavac.com](http://www.gigavac.com). For more information, contact [Jim Lanum](mailto:Jim.Lanum) at 805-755-2000 or visit [www.gigavac.com](http://www.gigavac.com).

GIGAVAC, today's expert in high voltage relays, markets a wide range of products that meet or exceed the relay specifications of industry leaders. Founded by leading professionals within the high voltage relay industry and based in Santa Barbara, California, GIGAVAC markets high voltage relays to manufacturers of test equipment, power supplies, wafer fabrication, RF and communications equipment, MRI/medical equipment and other manufacturers in need of high voltage relay solutions. Visit their website at [www.gigavac.com](http://www.gigavac.com) or call them at 805-755-2000.
