## GIGAVAC First to Offer Line of Fully Compliant RoHS High Voltage Relays ~More HV relays than all other manufacturers in the world combined

**Santa Barbara, California** - President Mike Molyneux proudly announced, "In keeping with our reputation of giving the industry what is needed, GIGAVAC now offers more RoHS (Restriction of Hazardous Substances) fully compliant high voltage relays than all other manufacturers in the world combined. We believe our RoHS relays are an important step in making the planet a safer place today and in the future. GIGAVAC still offers non-compliant relays for special applications such as aerospace where 'tin-whiskers' can be a problem. GIGAVAC is known as today's expert in high voltage relays and new product development. We are proud to lead the industry with these environmentally friendly products."

The European Union RoHS directive (which took effect on July 1, 2006) restricts the use of six hazardous materials in the manufacture of various types of electronic and electrical equipment. GIGAVAC's RoHS fully compliant high voltage relays have a maximum 0.1% concentration by weight in homogeneous materials of lead, hexavalent chromium, mercury, PBB and PBDE; and a 0.01% concentration of cadmium.

"There is no longer any reason why the users cannot have fully compliant high voltage relays in their systems, because GIGAVAC has RoHS fully compliant drop-in replacements in stock for nearly all relays made by other manufacturers," explains Jim Lanum, GIGAVAC's VP of Sales. "We offer vacuum, gas filled & reed HV relays as well as sealed Contactors for DC and AC switching up to 750 Volts, fully RoHS compliant at the same, low prices and in stock, ready to ship today."

GIGAVAC accepts all major credit cards and generally ships the same day the order is received. [Representatives throughout the world](#) can deliver the products in the user's country and currency at the lowest possible cost. For complete information and ordering, call 805-684-8401 or visit [www.GIGAVAC.com](http://www.GIGAVAC.com).

### **About GIGAVAC:**

*Based in Santa Barbara, California, GIGAVAC is today's expert in high voltage relays. Founded by leading industry professionals, GIGAVAC designs, manufactures and sells high voltage relays and contactors to manufacturers of test equipment, power supplies, wafer fabrication, RF and communications equipment, MRI/medical equipment and others in need of high voltage relay solutions; as well as users involved in heavy trucks and equipment, boats, light rail, mining, oil and factory automation power systems, battery charging and management systems, fuel cells, and solar, wind and wave power systems.
